

Advanced Sourcing Optimizer & Contracts+

Easily Turn Your Awards into Executed Contracts

Source to Contract with One Solution

JAGGAER One solutions make sourcing professionals more strategic and efficient. Struggling with disparate systems, sourcing professionals are often duplicating efforts and are left without a complete view of their sourcing options and agreements. By connecting suppliers, contracts and sourcing activities in one solution, JAGGAER One optimizes the sourcing experience. JAGGAER Advanced Sourcing Optimizer has everything buyers need to manage complex sourcing events and JAGGAER Contracts+ is a comprehensive solution managing every phase of contract management. These two solutions together let buyers seamlessly navigate their sourcing options into awarded contracts and track the results.

Strategic Sourcing for Complex Categories

Advanced Sourcing Optimizer allows a more strategic approach to sourcing decisions, evaluating the overall value of bids through real-world market conditions,

supplier performance, innovation and total value. Optimization-based scenario analysis aligns complex decision criteria with your rules, business goals and internal stakeholder preferences to arrive at a perfectly tailored decision that weighs costs and availability against risk, social responsibility and business value.

Using artificial intelligence, JAGGAER's Intelligent Award Navigator (IAN) identifies alternative awarding options within your scenarios by presenting choices that solicit your preferences for how your scenario rules are applied. Each time buyers make a decision that favors one preference over another, IAN will use that information to explore, find, and present new options. IAN continuously learns buyer preferences to improve possible outcomes giving buyers more options to present to their stakeholders.

Streamlined Contract Creation and Management

Contracts+ helps organizations maintain compliance and stay ahead of obligations —

JAGGAER 

Awarding Contracts

reducing supply chain risk and uncovering savings opportunities. Whether you need a simple, searchable contract repository or a full clause negotiation process, JAGGAER Contracts+ is scalable to fit a wide range of your needs. Contract management is streamlined with a comprehensive and configurable contract library. Contract creation is transformed with SMART templates, integration with Salesforce.com opportunities, and a decentralized contract request process for anyone in your organization to initiate a contract request. Collaboration is easy with suppliers from negotiation to payments. Artificial intelligence for automated contract

reviews and powerful analytics include trend and detailed performance reports for best in class contract management.

Sourcing and Contracts in JAGGAER ONE

Give your organization best in class solutions for both complex sourcing events and contract management while getting the benefits of a single system. Eliminate duplicate data entry, reduce errors and create a streamlined process from evaluation through contract execution. Make better, faster decisions with robust reporting of your sourcing and contracts in one place.
