To log into your JAGGAER Portal to manage your catalog(s), [click here](#).

IMPORTANT:

Are you prepared for **JAGGAER Security Upgrade to TLS 1.1/1.2?**

Latest Data Completeness Reports for Your Hosted Catalog

As you prepare for annual update of your catalog content, here is useful information to help identify any data gaps that need to be addressed – Date Completeness Reports (DCRs). It identifies gaps such as unmapped Product Size values, missing CAS Number values etc. It is result of third scheduled data quality evaluation for 2017, based on your hosted catalog content as of September 29, 2017. The DCR is a single pdf file of multi-page summary which evaluates hosted content in your catalog and indicates any data gaps that might be adversely affecting a buyer's experience.

DCR September 2017 Overview Document

Please [click here](#) to access this document. It explains how to read these reports, how evaluations are performed and how to close the data gaps.

DCR September 2017 For Your Catalog(s)

This document is specific for each catalog. You can access the document by clicking on the link(s) below. Note that if you have multiple catalogs with us, a separate link for DCR of each catalog has been provided.

These reports will be shared with the customers by the end of November 2017. If you have questions about the DCR, or any aspect of the data quality evaluation, please contact Dr. Subodh Joshi at sjoshi@jaggaer.com.

Product Release 17.3 Available Now

The latest upgrade of JAGGAER Procurement Solutions, Product Release 17.3, is now available. This Release includes enhancement to customer branded portals and diversity classifications, among other improvements. Note that on the login page for Supplier Network Portal, you now enter only you email and the password is accepted on next screen.

For complete listing of changes and improvements that are relevant to suppliers in this release, please [click here](#) to access the Supplier Release Notes. If you have any additional questions about any of these features, please contact Supplier Support by phone at (800) 233-1121, Option 2 or by creating a support request by filling in this [Supplier Support Request form](#).

JAGGAER Security Upgrade to TLS 1.1/1.2

As you may be aware, JAGGAER has been working on a plan to enhance security to our JAGGAER platform applications and action may be required by your IT department to ensure compatibility. Please forward this email to your IT Team so they can determine what action is needed.

In an effort to increase security JAGGAER will be depreciating Low and Medium Security Ciphers (TLS 1.0, RC4, MD5, etc.) and will require connectivity using TLS 1.1 or TLS 1.2 in both UIT and Production. After this change is made, all connections to JAGGAER's SelectSite application will require use of TLS 1.1/TLS 1.2, and High-level security ciphers.

Action is needed if cXML is employed when sending Order Confirmation, Advanced Shipping Notification (ASN), Invoices/Credit memos to JAGGAER. **If you are not sure whether you will be affected, please have your IT team contact our Supplier Support group using contact information given below.**

To access details about the security update, such as timeline, list of updated ciphers etc. please [click here](#).

If you have any questions or concerns, please contact Supplier Support by phone at (800) 233-1121, Option 2 or by creating a support request by filling in this [Supplier Support Request form](#).
