## Results of second evaluation of your hosted catalog(s)

Here are the results of our regularly scheduled second evaluation of hosted catalog content to ensure that it does not have any data gaps that might be adversely affecting buyers / customers. If you have a hosted catalog, please be sure to review the Data Completeness Report (DCR) provided below to see if your catalog has any data gaps. Hosted content for your catalog(s) as of 30th May 2018 was evaluated to generate these reports. The overview document will provide details of the DCR such as how the report is generated and importance of the attributes evaluated in the report.

**DCR May 2018 - Overview Document:** Please [click here](#) to access this document. It explains how to read these reports, how evaluations are performed and how to close any data gaps identified by these reports.

**DCR May 2018 For Your Catalog(s):** This document is specific for each catalog. You can

access the document by clicking on the link(s) below. Note that if you have multiple catalogs with us, a separate link for DCR of each catalog has been provided.

If you have any questions about the DCR, please contact Dr Subodh Joshi at [sjoshi@jaggaer.com](mailto:sjoshi@jaggaer.com).

## Release 18.2 Will be Available Soon

Our second scheduled Product Release of this year, Release 18.2, will be available in your Jaggaer Supplier Portal starting Sunday July 29th 2018. As always, we have added new functionality and enhanced existing one based on customer feedback. Along with additional diversity classifications, enhancements to sales invoices etc, we are adding couple of important functionalities around pricing for your catalog products. As we come close to the release date, Supplier Release Notes for this Release can be accessed by [clicking here](#). It will provide more details about all supplier facing aspects of the upcoming functionality in Release 18.2.

Please refer to next topic for more details about enhanced functionality related to Level II punch-out and Live Price that will be available with Release 18.2.

## Enhanced Catalog Functionality in Release 18.2

As part of Release 18.2, available starting July 29th 2018, we are enhancing the Catalog functionality in two ways;

1. **Ability for Customers to Enhance Level II Punch-out - Live Price Plus:** Level II punch-out allows the customer to see which products are available in supplier's punch-out within the JAGGAER application. However, they are unable to see the price and order the item without going to the punch-out. The Live Price Plus functionality will allow the existing Level II Punch-out integration to be configured to retrieve the price from the supplier's punch-out and display it directly in search results in the application. The customer will still have the ability to select the Level II Punch-out link if the price cannot be retrieved or if buyer needs to refer to additional product information.

Suppliers with existing Level II Punch-out integrations do not have to take any action for this feature, as it is driven by the customer's request. JAGGAER will contact suppliers if any additional testing or information is needed when setting up the customer enablement.

2. **Ability to Supplement Live Price with Level II Punch-out Information:** Live Price can now be enabled in conjunction with Level II Punch-out! Before this release, the only option was to enable one or the other. With the 18.2 Release, if the customer has the Live Price Integration enabled with a supplier, their site can be configured to show an additional Level II punch-out link under the live price item's product description. The addition of the Level II link to the Live Price enablement will let the buyer refer to more detail about the product from the punch-out site as well as help the user troubleshoot if a price cannot be retrieved from the Live Price integration.

This feature is enabled based on the customer's request, but the supplier must be able to support Level II Punch-out at the Product Level as well as Live Price for this feature to work.

If you have any questions/concerns about these enhanced Live Price / Punch-out functionalities please fill in [Request Supplier Support form](#). When filling in the form, please indicate "about enhanced punch-out functionality" at the top to help route the request.
