To log into your JAGGAER Portal to manage your catalog(s), [click here](#).

### IMPORTANT:

Are you aware of [changes needed for IP Address / Security Certificates?](#)

## Is SupplierNews Reaching Right People in Your Organization?

Our monthly newsletter, SupplierNews, contains important information such as security related topics, Release information, upcoming functionality details etc. It might be necessary for you to route it to appropriate persons within your organization. E.g. the next topic is meant for your IT department.

Here are best practices to ensure that the SupplierNews contents are being viewed, and if needed acted upon, by proper persons within your organization;

- Topics about hosted catalog, upcoming functionality are for general Portal users. If needed, we clearly indicate which group needs to view given information. Please be sure to send the newsletter to additional relevant persons within your organization. E.g. Be sure that your IT department has viewed the next topic, about IP address changes
- All active JAGGAER Supplier Portal users for your organization and all active contacts in the network profile in the Portal are included in the distribution list for the SupplierNews. If needed, Portal administrators can add additional users. Such

users may not necessarily use Portal functionality and their permissions can be adjusted accordingly

- If you are not sure if you need to take any action regarding a given topic, request Supplier Support by filling in [this form](#). In the Details section, please refer to the newsletter issue

## IMPORTANT: Have You Made IP Address Changes?

***We had provided information about IP address changes in June and subsequently provided a reminder about it at the beginning of each newsletter. We are now close to the planned change, scheduled for this weekend. Please be sure to route this information to any other persons within your organization if needed.***

In order to make necessary upgrades to our network infrastructure, JAGGAER Indirect is migrating all of our hosted services and integrations to new IP addresses on **Saturday, October 13, 2018**.

Therefore, if your organization uses firewall rules to permit access to our services based on their IP addresses, you will need to add additional firewall rules for the new IP addresses. Failure to do so will prevent your organization from accessing our hosted services and integrations. You can remove the old IP addresses on or after October 13, 2018.

Please [click here](#) to get the details. Please refer to the first topic, 'Upcoming IP Address Changes', in the document.

## Release 18.3 – Coming Soon!

Our third scheduled Product Release of this year, Release 18.3, will be available in your JAGGAER Supplier Portal starting Sunday, November 11, 2018.

Stay tuned for more specific details around important functionality in the November Edition of SupplierNews. As always, Release Notes can be accessed by [clicking here](#). This page provides Release Notes for previous Releases and as we get closer to the current Release 18.3, latest Release Notes will be made available.

## Questions?

For questions about topics in this newsletter, please contact:
