## Latest Data Completeness Reports for Your Hosted Content

We have completed the last scheduled evaluation of your hosted catalog content. It was performed on the hosted content of all supplier catalogs as of September 28, 2018. As usual, it identifies any data gaps – such as missing Manufacturer Name or unmapped Product Size values – that not only prevent buyers from purchasing your catalog products, but also cause downstream issues for the customer organizations. For an overview of the Data Completeness Reports (DCRs), please [click here](#).

Here are DCR(s) for your hosted catalog(s). Note that a separate DCR is generated for each catalog.

## Release 18.3 is Now Available!

Our third scheduled Product Release of this year, Release 18.3, is now available in your JAGGAER Supplier Portal, made available on Sunday, November 11, 2018.

For specific details about functionality made available in this Release, please refer to the Release Notes by [clicking here](#). This page provides Release Notes for previous Releases as well. Note that as part of such major Releases, we also make any updates as needed to various reference documentation made available in your JAGGAER Supplier Portal so be sure to use latest versions of such documentation.

## Time to Review Your Hosted Catalog Content

As we approach the end of 2018, this would be a good time to refresh your hosted catalog content – especially if you do not actively maintain catalog through the year. Here are some quick tips;

1. Be sure to delete products that you no longer offer. It is frustrating for a buyer to purchase a product only to find later that it is not being offered by the supplier anymore. You can use the 'Content – Delete' type submission to quickly delete such products.
2. If you offer products via customer specific pricing, note that you can make a product unavailable for a specific customer by deleting pricing for that specific customer.
3. Be sure to add any new products that you have started selling to your hosted catalog as well.
4. Make use of the 1000+ product attributes available for each of the product in hosted catalog to provide complete, rich product information to the buyers instead of cluttering up the Product Description.
