

## Supplier News - February 2020

### Reminder: Security Certificate Update Needed in February

**Please direct this request to your IT team(s) responsible for maintaining integrations between your organization and JAGGAER. Failure to evaluate/take action might adversely affect your integration points with the JAGGAER Procurement Application.**

JAGGAER's Certificate Authority (CA), GlobalSign, has issued new certificates signed by the R3 Root, and JAGGAER is required to use these new certificates moving forward. As a result, suppliers will be required to trust the new R3 Root and Intermediate Certificate Authority when our existing certificates are replaced per following schedule;

- **UIT environment:** Saturday, February 8th, beginning at 6:00 pm EST and completed by 11:00 pm EST
- **Production environment:** Saturday, February 22nd, beginning at 6:00 pm EST and completed by 7:00 pm EST

**IMPORTANT:** Action is needed if you use send Advanced Shipping Notification (ASN) via cXML, send Invoices/Credit memo etc to the JAGGAER Procurement Application. **If you are not sure whether you will be affected, please have your IT team contact our Supplier Support group using contact information given below.**

If your integrated systems are able to maintain multiple security certificates concurrently, please load these as soon as possible. You must have downloaded and installed the new certificates on the dates indicated above for the respective environments. Failure to use the new trusted certificates after the above dates may lead to integration failures with JAGGAER until the updated certificates are installed and trusted.

To download the updated security certificates in multiple formats including .cer, .der, .p7b and .pem, [please click here.](#)

## Get Ready for 20.1 Product Release

We are busy working on Product Release 20.1, scheduled to be made available in your JAGGAER Supplier Portal on 6th April 2020. It has exciting new features in various areas such as hosted catalog content, sourcing related updates etc. Here are highlights of some of the new features;

- Ability to add units in multiple languages and not just English
- A new product attribute for hosted catalog content that is designed to give a buyer better estimate of when the product will be received
- Availability of international pricing related to sourcing events and other enhancements

We will provide more details in the March issue of SupplierNews. As always, detailed Supplier Release Notes will be provided once the Product Release is available.

## Questions?

For questions about topics in this newsletter, please contact the Supplier Support group by [filling this form](#) or calling +1 (800) 233-1121, **Option 2**
