Supplier News - November 2020

Release 20.3 is Now Available

As scheduled, the 20.3 Release is now available in your JAGGAER Supplier Portal. With this Release, you will see new user search enhancements, ability to include attachments for Advanced Shipping Notices sent to buyers, and several sourcing event enhancements.

For all details about new functionality, please click [here](#) to access the "Release Notes" document.

Be Sure to Use the Latest Category List

As a part of the 20.3 Release, we updated our Taxonomy and now use latest UNSPSC version, v23.0701, as our reference version. While you need not take any action for your existing content, moving forward, you need to use the latest version of the 'Item Categories and Attributes' file available in your JAGGAER Supplier Portal. It has the latest list of valid Categories and also indicates changes made as part of the Taxonomy Update process.

To access this file in your JAGGAER Supplier Portal, go to the 'Tools > Online Training and Support > View Online Training and Support' page and refer to the 'Reference Materials' header on right side. Other relevant documentation, such as 'Catalog Management Templates' have been updated as well, as appropriate.

Latest Data Completeness Reports

We have completed the third scheduled evaluation of your hosted catalog content. Please be sure to review the results so you can update/enrich catalog content as needed, as part of any annual data review process.

The results, in form of 'Data Completeness Reports' are available in the main message text of this message, via links to the pdf documents. This evaluation was performed based on your hosted catalog content as of 27th September 2020.
