Supplier News - July 2021

Latest Data Completeness Reports (DCRs)

As per schedule, the latest Data Completeness Reports (DCRs) for your hosted catalog content have been generated. Hosted catalog content as of 28th May 2021 was used as a reference for this analysis. To review a document that provides details about how the DCR is generated and how to close any data gaps identified by it, please [click here](#).

The main message text in the email includes links for the DCR(s). Note that if you have multiple hosted catalogs with us, there is a separate DCR for each of the catalogs.

IMPORTANT: All browsers have recently implemented new security settings that prevent accessing pdf file from an FTP site by default. If your current version does not allow you to access the DCR using the link in email message, here are instructions to edit browser setting and be able to view/download the DCR. You can restore the settings back to previous configuration right after accessing the DCR.

In Firefox – open a new tab and enter “*About:Config*” in address bar. Hit Enter. Accept the security warning. In search box at top, enter “*network.ftp.enabled*” (without quotes). Double click on ‘false’ so it changes to ‘true’. You should now be able to download the DCR.

In Chrome OR Edge – open a new tab and enter “*chrome://flags*” OR “*edge://flags*” in address bar. In search box at top, enter “*Enable support for FTP URLs*” (without quotes). In dropdown, select ‘Enabled’. Restart Chrome OR Edge. You should now be able to download the DCR.

Upcoming Product Release R21.2

We would soon release latest update for the JAGGAER applications, including JAGGAER Supplier Portal. One of the notable features in this Release will be ‘ability for suppliers to create a change request for a Sales Order’. It will allow you to handle scenarios such as reducing quantity due to inventory restrictions etc. Such change requests will need to be approved by customer before being finalized into the document.

Release 21.2 is scheduled to be available on 25th July 2021. Once it is available, you will be able to access the Supplier Release Notes by [clicking here](#). The Supplier Release Notes will have details about new functionality, including the change request functionality indicated above.
