Data Completeness Reports for Hosted Content

The first evaluation of data completeness of hosted catalog content for this year has been completed. The results have been provided in the Data Completeness Reports (DCRs) in the email message text.

These DCRs are designed to identify any data gaps in your hosted catalog content that are adversely affecting buyer's purchasing experience for your catalog products. It might be lack of an important Product Flag identifying a product as hazardous substance or Image URL link not working as desired prompting the buyer to look elsewhere for the product. To access an overview document that gives details of DCRs, including ways to close any such data gaps and ensure your buyers have optimum experience, please click [here](#).

Year over year comparison with January 2021 data shows that 13% more hosted products were added and while this is substantial increase, the percentage of values for key attributes is maintained or shows slight increases. Details can be found in the overview document. Please continue to close any data gaps to help buyers find and purchase the products they need.

Avoid Consecutive Space Characters in Part Number Values

For a text type of Product Attribute used to get information about hosted catalog product, the value provided at the time of catalog submission is stored and displayed as such, with one exception – the space characters. If there are consecutive space characters, a single space character is displayed as it is a standard browser functionality. E.g. If you provide 'Standard shipping only' as value in the 'Comments' attribute, while it will be saved as such, it will be displayed as 'Standard shipping only' in search results.

While this helps normalize display of text, it can lead to confusion if Part Number values have such consecutive spaces. A single space character is commonly used in Part Number values. But it is best to avoid consecutive space characters in Part Number values, and any other searchable attribute such as 'Manufacturer Name'.
