

JAGGAER eProcurement

A Powerful Marketplace to
Drive Compliance,
Control, and Efficiencies

eProcurement combines comprehensive and highly configurable process management capabilities alongside a modern and extensive user-friendly shopping interface to drive compliance with procurement processes. This solution delivers a compelling ROI by enabling procurement organizations to influence buying decisions, significantly improve spend management across an organization's large supplier network, and offer a better purchasing experience for shoppers throughout the business.

Modern Shopping Experience Increases User Adoption

JAGGAER eProcurement delivers an intuitive purchasing experience that creates a unique one-stop shop for end users. With a familiar, modern online shopping experience, users can easily search for, find and requisition the items and services they need, improving broad adoption. OneShop search capabilities enable shoppers to view and compare items, details and pricing from all channels – hosted catalogs, punchout sites, internal inventory and even directly from supplier contracts – for a superior shopping experience. Budget checks and highly configurable approval workflows that model your business rules enable procurement to enforce compliance with policies and manage by exception. Meanwhile, the shopper can track the end-to-end process from requisition to order to delivery of their items all within the JAGGAER ONE platform.

Guide Buyers to the Right Items with the Right Suppliers at the Right Prices

Guided buying allows procurement policies to be applied automatically throughout the shopping experience. Set preferences to promote sources such as internal inventory, favored suppliers or specific items to guide the shopping process and support your business objectives. The elastic search, favorites, shopping dashboards and personalized shopping features lead shoppers to the right goods and services. Guided buying improves purchasing compliance and adds more savings to the bottom line.

Manage More Spend with Free Supplier Onboarding and Enablement

eProcurement provides direct and free access to a network of more than 3.7 million suppliers. In addition, JAGGAER's turnkey supplier enablement service fully onboards an unlimited number of your preferred suppliers into the network, enabling catalogs and supplier integrations that drive compliant spending more effectively. This free service ensures better supplier collaboration and performance with a supplier network managed by JAGGAER through a simple but robust supplier portal.

Simplify Management of Extensive Procurement Projects

The size and complexity of large capital projects poses many challenges for procurement. Project-Based Procurement (PBP) pulls all

JAGGAER 

the contracts, suppliers, sourcing events and transactions associated with a project under a single umbrella, making it easy to collaborate across team members, assign tasks, and enforce contract compliance. Visibility tools give stakeholders across the organization the ability to easily track and monitor project status, budget performance and compliance at any point, without needing to consolidate reports across dozens of purchasing categories. Take control of large project spend and put procurement at the center of complex spending projects with PBP.

All Spend Management Processes in One Platform for Complete S2P Integration

Within the JAGGAER ONE platform, procurement activities are one piece of a comprehensive spend management suite. With all supplier, contract, purchasing, invoicing, and sourcing data and process flows in a single platform, JAGGAER ONE provides a consistent and accurate reporting and analytics model. The data and processes flowing through JAGGAER ONE will help you achieve a full digital transformation of the procurement function and be positioned to make informed decisions across the entire organization faster and with more precision than ever before.

Key Features

Shopping and Marketplace

- ➔ OneShop search for one-stop shopping across all buying channels: catalogs, forms, contracts and internal inventory and sourcing events
- ➔ Guided buying directs shoppers to your preferred suppliers, items and services
- ➔ Unlimited, free supplier enablement services deliver more catalogs for a robust marketplace

Requisition and PO Workflow

- ➔ Flexible business rules can be created with varying criteria based on who is buying what
- ➔ Workflow automation based on business rules enables “manage by exception”
- ➔ Workflow can be integrated with other systems, such as ERP or other JAGGAER ONE solutions

Contract Compliance

- ➔ Contracts maintained in the JAGGAER ONE platform
- ➔ Automatically applied to purchases based on criteria of item, user or supplier
- ➔ Visible in search results with custom forms to buy directly from a contract

Benefits at a Glance

- ➔ Improve purchasing experience with OneShop search capabilities to find items from any channel
- ➔ Benefit from existing supplier relationships and enable more suppliers for a broad, more expansive marketplace
- ➔ Streamline procurement processes by integrating with Invoicing and Inventory Management
- ➔ Highly configurable workflows to match your ideal processes
