

JAGGAER ONE

All Spend, All Processes,
One Platform

JAGGAER One is a unified platform for the complete digital transformation of procurement. It is the only spend management platform that can seamlessly manage 100% of your spend across the full range of sourcing, procurement and supply chain management activities.

One Source of the Truth

JAGGAER ONE provides a single source of the truth for global spend, contracts, and supplier performance. Managing all spend activity, the JAGGAER ONE platform serves as a central data repository, preventing duplication and manual data handling between processes, thereby ensuring consistent and accurate reporting and analytics. As the authority for project and savings management, the platform also optimizes project scheduling, activities, and results. With all your data and processes flowing through the JAGGAER ONE platform, you'll achieve a full digital transformation of the procurement function and be in a position to make informed decisions across your entire business faster than ever before.

The Most Comprehensive Spend Management Solutions

JAGGAER ONE is the foundation upon which the entire JAGGAER Source-to-Contract, Procure-to-Pay and Supply Chain Execution solution portfolio is managed. The JAGGAER ONE platform houses the supplier data you

need to conduct business, the contract and pricing data from which your employees shop and make purchases, and the process workflows that route activities to the right reviewers and approvers. It also supports integrations with all ERP systems, back office systems and third-party solutions for eSignatures, tax and invoice compliance, and risk indicators.

Built on a service-oriented architecture, JAGGAER ONE provides a plug-and-play environment for enabling solutions that are tailored to spend type, process complexity, and unique use cases. With more options to tailor your solution portfolio to your specific needs, you can easily ensure optimal management of 100% of your spend – capex, direct, indirect, services, transportation, supply chain – in one unified platform. JAGGAER ONE is also fully extensible: with everything on a single platform, you can easily enable additional solutions and capabilities as your needs change, your organization's strategies evolve, and your influence over different spend categories increases.

Turnkey Supplier Network Management

Through JAGGAER ONE you have direct and free access to a network of more than 3.7 million suppliers worldwide; suppliers that JAGGAER manages for you. Our turnkey

JAGGAER 

supplier enablement service fully onboards and integrates your preferred suppliers into the network, enabling you to have the catalogs and supplier information to drive compliant spending most effectively. With one supplier network and a simple but robust supplier portal, you can ensure better supplier collaboration and performance.

ERP Integration

Unlike other vendors, JAGGAER is independent and ERP system-agnostic. The JAGGAER ONE platform integrates seamlessly with your existing enterprise resource planning system(s), giving a streamlined set of ERP integrations across all JAGGAER solutions with consistent protocols and security. JAGGAER supports SOAP and CSV-driven ERP integrations, all managed by our dedicated Professional Services team. Plus, SAP connectors are ready to use, built on proprietary SAP technology for rapid deployment.

Secure Access from Anywhere

Access to JAGGAER solutions, whether from a web browser or a mobile device, is handled through JAGGAER ONE. Identity and access management is governed at the platform level using JAGGAER Single Sign-On, which grants user access to solutions, data, and partnerships based on their personal accreditations and privileges. JAGGAER SSO is based on industry standard protocols, guaranteeing security and compliance with your strictest IT standards.

Strategic Partnerships

JAGGAER ONE comes with a complete ecosystem of partners. Together, we deliver outcomes that no other solution provider can. Whether you're researching financial data from Dun & Bradstreet, initiating and managing R&D outsourcing through Science Exchange, or gathering electronic contract signatures through DocuSign, JAGGAER ONE is the lynchpin for all of our technology partners' applications to our solution suite.

For additional partnerships, JAGGAER supports custom integrations through development activities, managed by our Customer Success team. File transfer connectors also allow for integration with legacy systems, so you can connect any way you want.

Key Benefits

- Streamlined, centralized workflow and end-to-end process automation, driving 100% compliance with corporate processes on a single platform
- Plug-and-play solution options to support your business needs and use cases, spend categories, transformation strategies, and future growth plans
- Better supplier collaboration, performance and development for future success, through a modern, managed, comprehensive no-cost supplier network
- Rapid setup with implementation times averaging less than three months and demonstrable ROI in under a year thanks to comprehensive savings management
- Fully extensible and scalable to grow with your needs
