

JAGGAER Direct

Quality Audit Management

Make Quality Audit Management Faster and Easier by connecting it to Supplier Relationship Management.

Do you audit suppliers? Would you like to use these audits to improve SRM and Sourcing?

The Intelligent Procurement Platform

JAGGAER Direct Quality Audit Management makes auditing suppliers easier and faster. It also connects results to your other activities. So you can connect them to JAGGAER Direct 360° Supplier Cockpit and Supplier Development.

What's more, you can easily track all your audits in one place. The system records all planned and previous audits. You can also build questionnaires to use as templates.

Our Product Highlights

Flexible questionnaires

- Edit and change questionnaires to match your needs and preferences.

Self-assessment

- Compare the supplier's self-evaluation with your own audit results automatically in JAGGAER.

Audit score sheet

- Send the audit results to your suppliers as a score sheet. Any deviations will be highlighted and can be entered and saved immediately, along with any necessary improvement measures. These must be completed by the suppliers.

Comments

- You can also add comments to the audit sheet for each supplier.

Weighting

- Assign an individual score or weighting to each response in the audit.

Workflows

- Workflows make it easy to collect and distribute information efficiently.

Reject suppliers

- You can easily categorize and classify reasons for rejecting a supplier.

Benefits

- Make intelligence actionable with alerts and notifications
- Make better, more comprehensive decisions
- Broader, deeper, real-time view of your spend
- Bring all your data together in one place
- Spend less time digging for insights
